Labeling Markets Africa & Middle East Market Study & Sourcebook 2012

Since 1980, AWA Alexander Watson Associates have regularly published comprehensive reports on label and product decoration markets, defining regional and application opportunities for all labeling formats. **Labeling Markets: Africa and Middle East Market Study & Sourcebook 2012** is the first assessment of the label market in this region published by AWA.

The report details trends in the African and Middle Eastern market by label technology, with chapters dedicated to pressure-sensitive, glue applied, sleeve, and in-mold labeling. The study focuses on product decoration and identification, with particular emphasis on face materials required for the production of labels in their various formats. The value chain tool is used to analyze the African and Middle Eastern label market.

Labeling Markets: Africa and Middle East Market Study & Sourcebook 2012 details materials, conversion technologies, application methods, and end uses for all label formats. It gives information on the markets and market trends.

Research for this study is based on our internal database of label market information, a review of available published literature, an analysis of trade and industry statistics, and interviews with companies across the value chain, together with input from AWA industry conferences and events specific to the label and specialist converting industries.
